Lord Fairfax Health District 2012 Youth Risk Behavior Survey Summary Report – High School

Introduction

The Youth Risk Behavior Survey (YRBS) is part of the Youth Risk Behavior Surveillance System (YRBSS) developed in 1990 by the U.S. Centers for Disease Control and Prevention (CDC) to monitor behaviors that affect morbidity (disease) and mortality (death) among middle- and high-school age youth. The YRBSS monitors seven categories of priority health-risk behaviors among youth, behaviors that contribute to unintentional injuries and violence; sexual behaviors that contribute to unintended pregnancy and sexually transmitted diseases; alcohol and other drug use; tobacco use; unhealthy dietary behaviors; inadequate physical activity; and prevalence of obesity and asthma.

In the fall of 2012 the Virginia Department of Health's Lord Fairfax Health District, in collaboration with the local school systems, administered the 2011 version of the YRBS to eighth and 11th grade students in the counties of Clarke, Frederick, Page, and Warren, and the City of Winchester. Shenandoah County Schools participated in an earlier survey administration and did not participate in the fall. A middle school and high school report was generated for each of the participating school districts along with the LFHD wide summaries for each grade.

The YRBS provides data that may be used by schools, state or local government agencies, or community organizations for policy development and program planning. Comparison of data to subsequent and previous administration of the YRBS can also reveal trends in these behaviors.

Survey Administration Procedures

The survey was administered in the classroom by school staff. The paper-and-pencil survey was short enough to be completed during a typical class period. Participation in the survey was voluntary, and students could skip any questions they did not want to answer. Parents were able to opt-out their child if they did not want him or her to participate.

Data Presentation

This report presents YRBS data in tables, by sex, grade level, and total sample. Highlights of the data are presented in the bulleted narrative. Data summaries for each question in the YRBS questionnaire are included in the Appendix.

The following categories of student behaviors are presented in this report: 1) traffic safety, 2) violence, 3) bullying, 4) suicide, 5) tobacco use, 6) alcohol use, 7) marijuana and other drug use, 8) sexual behavior, 9) body weight and dieting, 10) nutrition, and 11) physical activity.

Demographic Profile

A demographic profile of the survey sample is presented in the table below. A slightly higher percentage of respondents were female (50.5%) than male (49.3%). In response to the question addressing ethnicity, a majority of respondents identified themselves as Not Hispanic or Latino (88.0%), and a majority of the students identified their race as White (78.6%). All respondents to the survey are in the 11th grade.
